PROJECTS

Web Developer

2014

Freelance

PackSnap | ([source](#))

A visual travel app, focusing on UX/UI, that lets users find and suggest unique items to pack for future trips.

- Built with: *Ruby, Rails, JavaScript (jQuery, AJAX), and Google Maps, Forecast.io, and Amazon APIs*
 - Mapped out the tables and associations, and kept the diagram updated in order to prevent confusion as the app was being developed
 - Wireframed the project and used Test Driven Development while building the app by using RSpec

GameOverflow | ([source](#))

A gaming web app where a user can post topics about a video game, console, and/or genre, and vote on content.

- Built with: *Ruby, Rails, JavaScript (jQuery, AJAX)*
 - Wireframed the front end and back end, and created the tables and associations
 - Worked on the front end views using CSS3

Fat Princess | ([source](#))

A game in which a princess is controlled through Mousetrap key calls and eats cake and carrots, which make her grow and gain points, and shrink and lose lives, respectively.

- Built with: *JavaScript (jQuery)*
 - Worked on front end appearance and the movements of the princess, carrots, and cake

EXPERIENCE

Piedmont Bark, Atlanta, GA

2012–2013

Kennel Technician

- Supervised and interacted with 100+ dogs a day while working both as a member of a team and independently

Six Flags Over Georgia, Austell, GA

2011

Food Preparation

- Multitasked by preparing food and cleaning facilities while maintaining an organized workspace
- Created positive connections with guests to optimize customer satisfaction
